

April 2023 Medicaid and CHIP Enrollment Trends Snapshot

*Center for Medicaid
and CHIP Services*

Enrollment Snapshot

- To monitor states' progress after the end of the Medicaid continuous enrollment condition and states' return to regular eligibility operations, including conducting full renewals, this Enrollment Snapshot captures high level information on the most recently submitted month of Performance Indicator Enrollment Data¹ within the context of trends prior to the COVID-19 public health emergency (PHE), as well as trends prior to the end of the Medicaid continuous enrollment condition,^{2,3} focusing on:
 - Total Medicaid and CHIP enrollment;
 - Medicaid enrollment;
 - CHIP enrollment;
 - Adult enrollment; and
 - Child enrollment.
- This analysis also captures high level information on the trend in the number of Medicaid and CHIP applications received by states.

¹ Performance Indicator Enrollment Data counts individuals receiving full-scope and comprehensive Medicaid and CHIP benefits.

² February 2020 serves as the baseline prior to the impacts of the COVID-19 pandemic and the enactment of the Families First Coronavirus Response Act (FFCRA) in March 2020. March 2023 serves as the baseline before states began disenrolling individuals from Medicaid coverage after the end of the Medicaid continuous enrollment condition. For more information, please visit <https://www.medicaid.gov/resources-for-states/coronavirus-disease-2019-covid-19/unwinding-and-returning-regular-operations-after-covid-19/index.html>.

³ Section 6008 of FFCRA included a Medicaid continuous enrollment condition through March 31, 2023, and states that complied received a temporary federal medical assistance percentage (FMAP) increase.

Key Findings

- In April 2023, **94,151,768** individuals were enrolled in Medicaid and CHIP.¹
 - **87,062,629** individuals were enrolled in Medicaid in April 2023, an increase of **348,055** individuals from March 2023.
 - **7,089,139** individuals were enrolled in CHIP in April 2023, a decrease of **73,121** individuals from March 2023.
- Since February 2020, enrollment in Medicaid and CHIP has increased by **23,276,699** individuals (32.8%).
 - Medicaid enrollment has increased by **22,982,836** individuals (35.9%).
 - CHIP enrollment has increased by **293,863** individuals (4.3%).
- Medicaid enrollment likely increased due to the COVID-19 PHE and Medicaid continuous enrollment condition under the Families First Coronavirus Response Act (FFCRA), which started in March 2020 and ended on March 31, 2023.²

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.

¹ Performance Indicator Enrollment Data counts individuals receiving full-scope and comprehensive Medicaid and CHIP benefits.

² Families First Coronavirus Response Act, Pub. L. No. 116-127, Sec 6008, Temporary Increase of Medicaid FMAP. Note that Sec. 6008 of the FFCRA is amended by the Consolidated Appropriations Act, Pub. L. No. 117-328.

Key Findings (continued)

- In April 2023, **2,329,772** applications for Medicaid and CHIP were submitted directly to states.¹
 - The number of applications submitted directly to states was 0.7 percent lower in April 2023 compared to March 2023.
- In April 2023, **152,684** applications were transferred from the Federally Facilitated Marketplace (FFM) to states.²
 - The number of transferred applications was 12.6 percent lower in April 2023 compared to March 2023.

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.

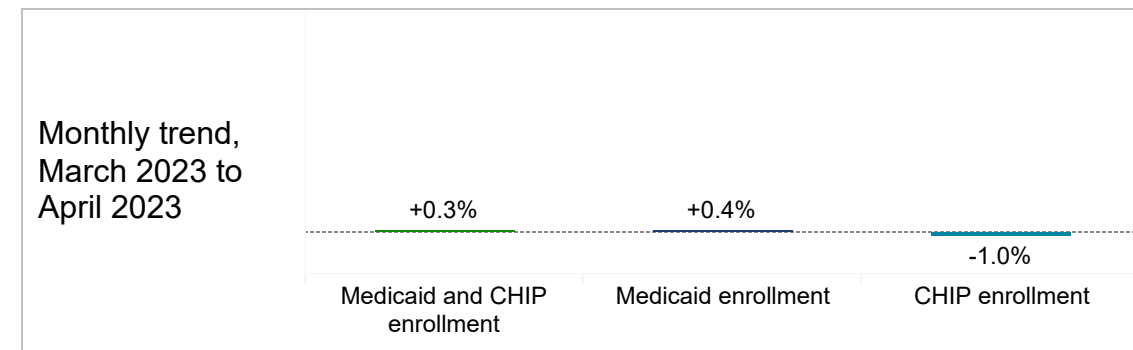

¹ These counts include applications received by 49 states and the District of Columbia. Kansas is excluded because the state did not report applications data for March 2023 and April 2023. For additional information, please see Figure 4.

² These counts include applications and account transfer data from 49 states and the District of Columbia. Kansas is excluded because the state did not report applications data for any month during the analysis. For additional information, please see Figure 6.

Figure 1. National Medicaid and CHIP enrollment, February 2020 to April 2023, CMS Performance Indicator Data

	Medicaid and CHIP enrollment	Medicaid enrollment	CHIP enrollment
April 2023	94,151,768	87,062,629	7,089,139
March 2023	93,876,834	86,714,574	7,162,260
March 2023	93,876,834	86,714,574	7,162,260
February 2020	70,875,069	64,079,793	6,795,276

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.
Note: This analysis includes preliminary enrollment data from 50 states and the District of Columbia. February 2020 serves as the baseline of enrollment prior to the impacts of the COVID-19 pandemic and the Families First Coronavirus Response Act (FFCRA) continuous enrollment condition. The grey area on the line graphs represents the overall trend between February 2020 and May 2022, and is included to provide additional context to the annual trend from May 2022 to April 2023. March 2023 serves as the baseline of enrollment prior to the end of FFCRA’s continuous enrollment condition, after which states may initiate the disenrollment of individuals who have not had their Medicaid eligibility successfully renewed in the past 12 months. For additional information on Medicaid and CHIP enrollment from December 2019 to April 2023, please see Appendix A.

Figure 2. National adult and child enrollment in Medicaid and CHIP, February 2020 to April 2023, CMS Performance Indicator Data

	Adult Medicaid enrollment	Child Medicaid and CHIP enrollment	Child Medicaid enrollment	Child CHIP enrollment
April 2023	49,632,768	42,215,380	35,270,932	6,944,448
March 2023	49,405,893	42,138,832	35,123,785	7,015,047
March 2023	49,405,893	42,138,832	35,123,785	7,015,047
February 2020	34,132,212	35,037,068	28,339,309	6,697,759

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.
Note: This analysis includes preliminary enrollment data from 49 states and the District of Columbia. Arizona is excluded because the state did not report the breakouts for adult and child enrollment between February 2020 and April 2023. February 2020 serves as the baseline of enrollment prior to the impacts of the COVID-19 pandemic and the Families First Coronavirus Response Act (FFCRA) continuous enrollment condition. The grey area on the line graphs represents the overall trend between February 2020 and May 2022, and is included to provide additional context to the annual trend from May 2022 to April 2023. March 2023 serves as the baseline of enrollment prior to the end of FFCRA's continuous enrollment condition, after which states may initiate the disenrollment of individuals who have not had their Medicaid eligibility successfully renewed in the past 12 months. For additional information on Medicaid and CHIP enrollment from December 2019 to April 2023, please see Appendix B.

Figure 3. Change in total Medicaid and CHIP enrollment, March 2023 to April 2023, CMS Performance Indicator Data

Nationally, total Medicaid and CHIP enrollment increased by 0.3 percent from March 2023 to April 2023. In 42 states and the District of Columbia, total Medicaid and CHIP enrollment increased by less than 2.0 percent. In 5 states, total Medicaid and CHIP enrollment decreased by less than 2.0 percent. In Idaho, New Hampshire, and South Dakota, total Medicaid and CHIP enrollment decreased by more than 3.0 percent.⁽¹⁾

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.

Note: This analysis includes preliminary enrollment data from 50 states and the District of Columbia.

Data Context: (1) In Idaho, total Medicaid and CHIP enrollment decreased by 3.8 percent (17,252 individuals). In New Hampshire, total Medicaid and CHIP enrollment decreased by 10.9 percent (27,316 individuals). In South Dakota, total Medicaid and CHIP enrollment decreased by 8.9 percent (13,098 individuals). These states resumed disenrollments on April 1, 2023, following the March 31, 2023 end of the Medicaid continuous enrollment condition.

Figure 4. National Medicaid and CHIP applications submitted directly to states from 2019 to 2023, CMS Performance Indicator Data

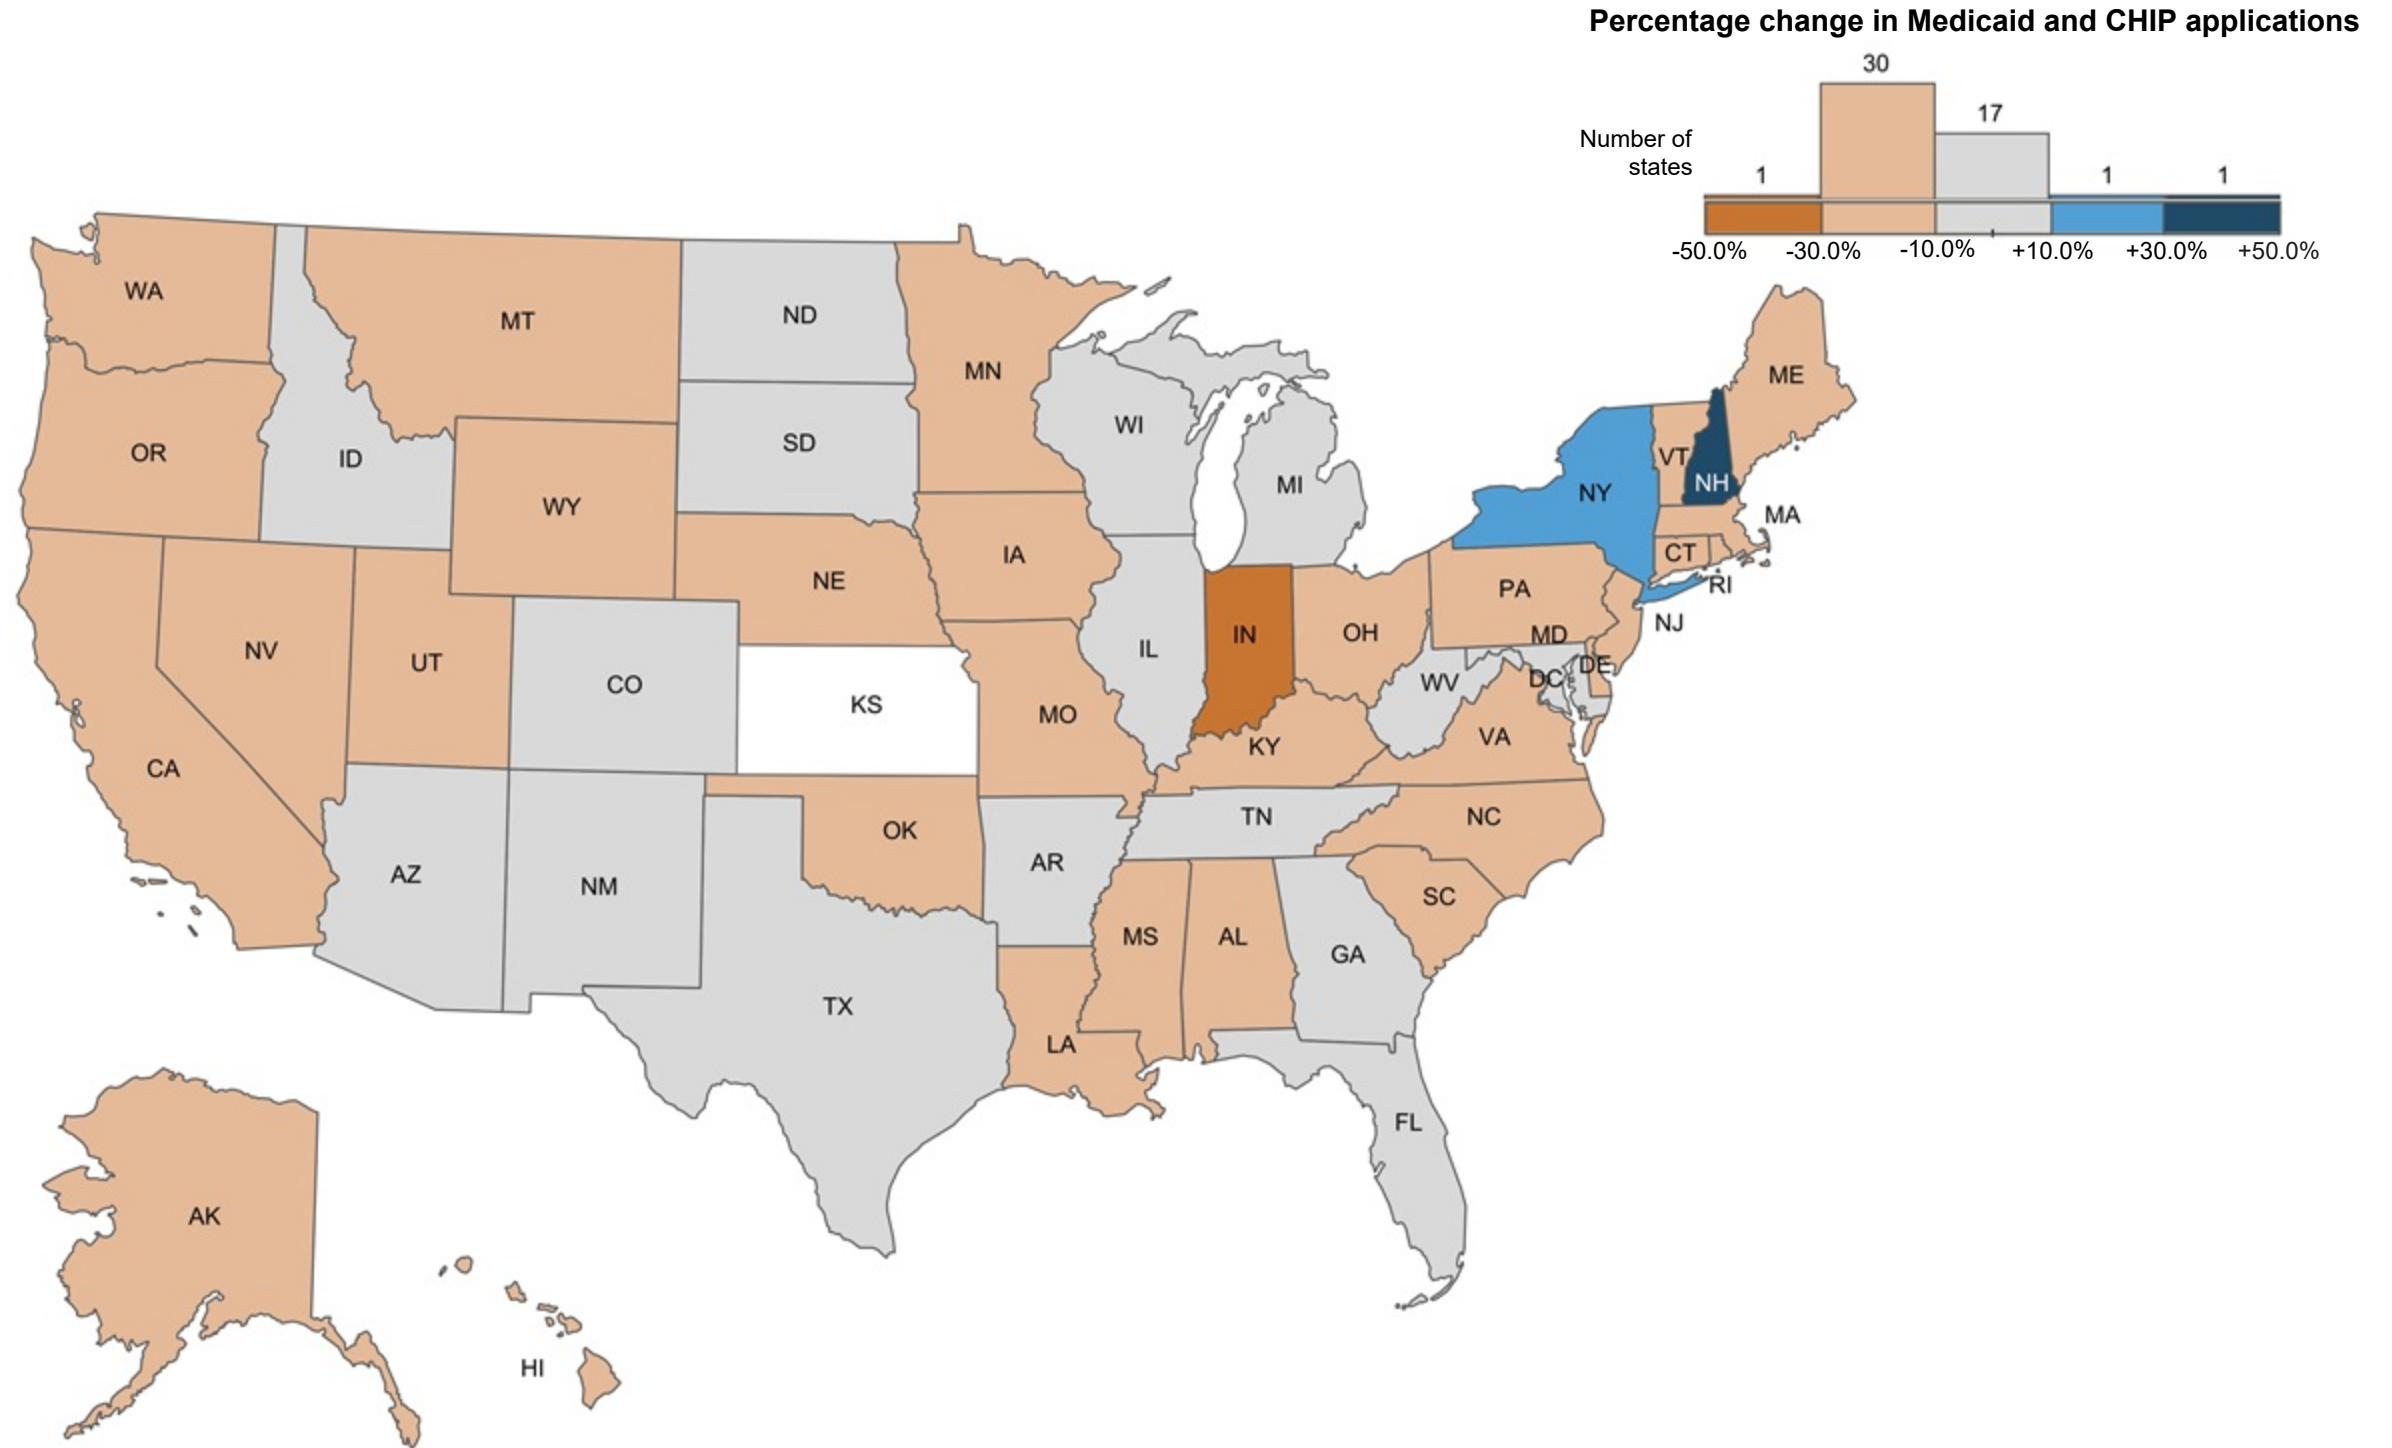

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.

Note: Applications submitted directly to states include applications received by any state agency to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM are not included. This analysis includes preliminary data from 49 states and the District of Columbia. Kansas did not report applications data for any month between January 2019 and April 2023 and so is excluded.

Data context: Tennessee did not report applications in January and February 2019. Maine did not report applications in June 2020.

Figure 5. Change in Medicaid and CHIP applications submitted directly to states, March 2023 to April 2023, CMS Performance Indicator Data

Nationally, the number of Medicaid and CHIP applications submitted directly to states was about 0.7 percent lower in April 2023 compared to March 2023. In most states (30), applications decreased by 10 percent to 30 percent. Applications changed by less than 10 percent in 16 states and the District of Columbia. In Indiana, applications decreased by more than 30 percent.⁽¹⁾ By contrast, both New York and New Hampshire experienced an increase in applications submitted: New York experienced a 15 percent increase,⁽²⁾ and New Hampshire experienced a 41 percent increase.⁽³⁾

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.

Note: Applications submitted directly to states include applications received by any state agency to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM are not included. This analysis includes preliminary data from 49 states and the District of Columbia. Kansas did not report applications data for any month between March 2023 and April 2023 and so is excluded.

Data Context: (1) In Indiana, applications decreased by 31.0 percent (10,617 applications). (2) In New York, applications increased by 14.8 percent (125,825 applications). (3) In New Hampshire, applications increased by 40.8 percent (1,954 applications).

Figure 6. Comparison of Medicaid and CHIP enrollment with the number of applications received, February 2020 to April 2023, CMS Performance Indicator Data

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.
Note: Applications submitted directly to states include applications received by any state agency to make Medicaid or CHIP eligibility determinations, including the Medicaid agency, a separate CHIP agency, or a state-based marketplace. Applications transferred from the FFM to states include the total number of accounts electronically transferred from the FFM to states for Medicaid or CHIP. This analysis includes preliminary enrollment data from 50 states and the District of Columbia, and applications and account transfer data from 49 states and the District of Columbia. Kansas did not report data on applications submitted directly to states for any month between February 2020 and April 2023 and so is excluded. The grey area on the graphs represents the overall trend between February 2020 and May 2022, and is included to provide additional context to the annual trend from May 2022 to April 2023.
Data context: Maine did not report applications in June 2020.

Source: Medicaid and CHIP Eligibility and Enrollment Performance Indicator Data as of June 13, 2023.

Note: This table summarizes adult and child enrollment in Medicaid and CHIP since December 2019. This table is provided as a supplement to Figure 2, and includes preliminary enrollment data from 49 states and the District of Columbia. Arizona is excluded from both Figure 2 and Appendix B because the state did not report the breakouts for adult and child enrollment between December 2019 and April 2023.

Background

- This is a Center for Medicaid & CHIP Services (CMCS) Medicaid and CHIP Coverage Learning Collaborative (MAC LC) project that monitors Medicaid and Children's Health Insurance Program (CHIP) enrollment trends, primarily using the Centers for Medicare and Medicaid Services (CMS) Performance Indicator Data.
- The MAC LC is a CMCS project that provides a forum for facilitated discussion and learning across CMS and states, with the goal of implementing and improving the programs, tools, and systems needed to ensure high-performing state health insurance programs. The MAC LC has enabled CMS to more effectively identify issues and also monitor and improve program performance.
- This snapshot is a companion to the April 2023 Medicaid & CHIP Application, Eligibility, and Enrollment Data posted on [Medicaid.gov](https://www.Medicaid.gov).
- The Enrollment Trends project primarily relies on Performance Indicator Data. All states—including the District of Columbia—provide data each month about their Medicaid and CHIP eligibility and enrollment activity. These data reflect a range of indicators related to key application, eligibility, and enrollment processes within the state Medicaid and CHIP agency. The complete data set is available on Data.Medicaid.gov.
