

# MAGI Application Processing Time Snapshot Report: April 2023 - June 2023

*Center for Medicaid  
and CHIP Services  
October 31, 2023*

# MAGI Application Processing Data

The Modified Adjusted Gross Income (MAGI) application processing time data represent the length of time it takes state Medicaid and Children's Health Insurance Program (CHIP) agencies to conduct all final MAGI determinations (including Medicaid MAGI and CHIP) for individuals at application, regardless of date of application.

- Application processing time data are influenced by state policies, practices including verification processes, and other factors including application volume, staffing, and level of automation in a state's eligibility system.
- States may prioritize processing older applications, and, as these are completed, the data would reflect longer processing times, with the volume and age of pending applications decreasing.
- Processing time data do not reflect the state's volume of pending applications.
- This processing time data excludes renewals and redeterminations.

# Current Issue

- Up until 2022, the MAGI Application Processing Time Report (Processing Time Report) was published on an annual basis with the Medicaid and CHIP Scorecard. To date, we have published annual reports for [2018](#), [2019](#), [2020](#), and [2021](#).
- Since 2022, the Processing Time Report has been released on a quarterly basis, and CMS plans to continue to release the report on a quarterly basis going forward.
- This Processing Time Report reflects April 2023 – June 2023 data for all states<sup>i</sup> and is the first report to include processing time data reflecting the period in which states began unwinding the Medicaid continuous enrollment condition of the Families First Coronavirus Response Act (FCCRA).
- All Processing Time Reports are available on [Medicaid.gov](#).

i. For each reporting month, states submit preliminary Performance Indicator (PI) data, and a month later, updated PI data. Preliminary data carries over to the updated report, and states are not required to make changes to their preliminary processing time data when they submit the updated PI report. For the vast majority of states, there are no changes to the processing time data between the two reports. For states that do make changes to the processing time data, it is typically due to a lag in data availability. In these instances, the change is considered a correction and CMS requires the state to apply the correction to the processing time data in both the preliminary and updated reports. This report reflects states' preliminary MAGI processing time data for April 2023 – June 2023.

# Methodology

The Performance Indicator MAGI application processing time data reflect the number of calendar days between the date the state agency *receives* an initial application and the date the state agency *makes a final eligibility determination*.

- As part of their monthly Medicaid and CHIP Performance Indicator report to CMS, states report processing time data at the individual level<sup>i</sup> and include both final eligible and ineligible determinations.
- Application processing time data excludes redeterminations<sup>ii</sup>, determinations based on beneficiary changes in circumstances, presumptive eligibility determinations, and final determinations from the Federally Facilitated Exchange (FFE).

i. In April – June 2023, Florida, Indiana, Nevada, South Dakota, and Wisconsin incorrectly reported their processing time data at the application level, as opposed to the individual level. See slides 12 – 26 for state-specific data and limitations notes.

ii. In April – June 2023, Alaska, Arizona, California, Pennsylvania, and South Dakota incorrectly included redeterminations in their application processing time data. See slides 12 – 26 for state-specific data and limitations notes.

# Data Quality

States with significant data quality issues are excluded from the national-level statistics presented in this report. Significant data quality issues are excluded from the national calculations presented in this report, including:

- Missing a significant portion of determinations.
- Failing to include all calendar days that elapsed between receipt of the application and the final determination.
- Including a significant portion of renewal processing time data with MAGI application processing time data.
- Failing to report determinations in the correct time categories.

For the period of April 2023 – June 2023:

- California, Nevada, and South Dakota did not report April – June MAGI processing time data that aligned with CMS's specifications.
- California, Nevada, and South Dakota data are excluded from the national-level statistics presented in this report.

# MAGI Application Processing Time Categories

These reports reflect the percentage of MAGI determinations at application that were processed within each of the following time categories:

- Less than 24 hours.
- 1 – 7 days.
- 8 – 30 days.
- 31 – 45 days.
- Greater than 45 days.

# Processing Time Report Key Findings

Of the 48 states that reported Medicaid MAGI application processing time data to CMS's specifications for the **April 2023 – June 2023 period**:

- **< 24 Hours:** Over half (57 percent) of all MAGI determinations at application were processed in under 24 hours.
- **Within 7 days:** Over two-thirds (70 percent) of all MAGI determinations at application were processed within seven days:
  - In 22 states, more than 60 percent of MAGI determinations at application were processed within 7 days.
  - In 15 states, 40 percent or less of MAGI determinations at application were processed within 7 days.
- **> 45 Days:** Approximately 5 percent of all MAGI determinations at application were processed in more than 45 days.

# Prior Year Comparisons

In the **April – June 2023** compared to the **April – June 2022** MAGI application processing time data, there was a:<sup>i</sup>

- 5-percentage point increase in the percentage of MAGI determinations at application processed in under 24 hours, from 52% in 2022 to 57% in 2023.
- 1-percentage point increase in the percentage processed within 7 days, from 69% in 2022 to 70% in 2023:
  - 13 states reported an increase of at least 1 percentage point.<sup>ii</sup>
  - 26 states reported a decrease of at least 1 percentage point.<sup>iii</sup>
- 2-percentage point decrease in the percentage processed in more than 45 days, from 7% in 2022 to 5% in 2023.

MAGI Application Processing Time						
National Totals Per Month <sup>iv</sup>	Percent of Determinations Processed < 24 Hours		Percent of Determinations Processed 1–7 days		Percent of Determinations Processed > 45 Days	
	2022	2023	2022	2023	2022	2023
<b>April</b>	52%	54%	15%	14%	9%	7%
<b>May</b>	54%	57%	17%	13%	7%	4%
<b>June</b>	51%	59%	18%	13%	7%	4%
<b>April – June Average</b>	52%	57%	17%	13%	7%	5%

i. In both periods (April – June 2022 and April – June 2023), CA, NV, and SD were excluded from the national totals.

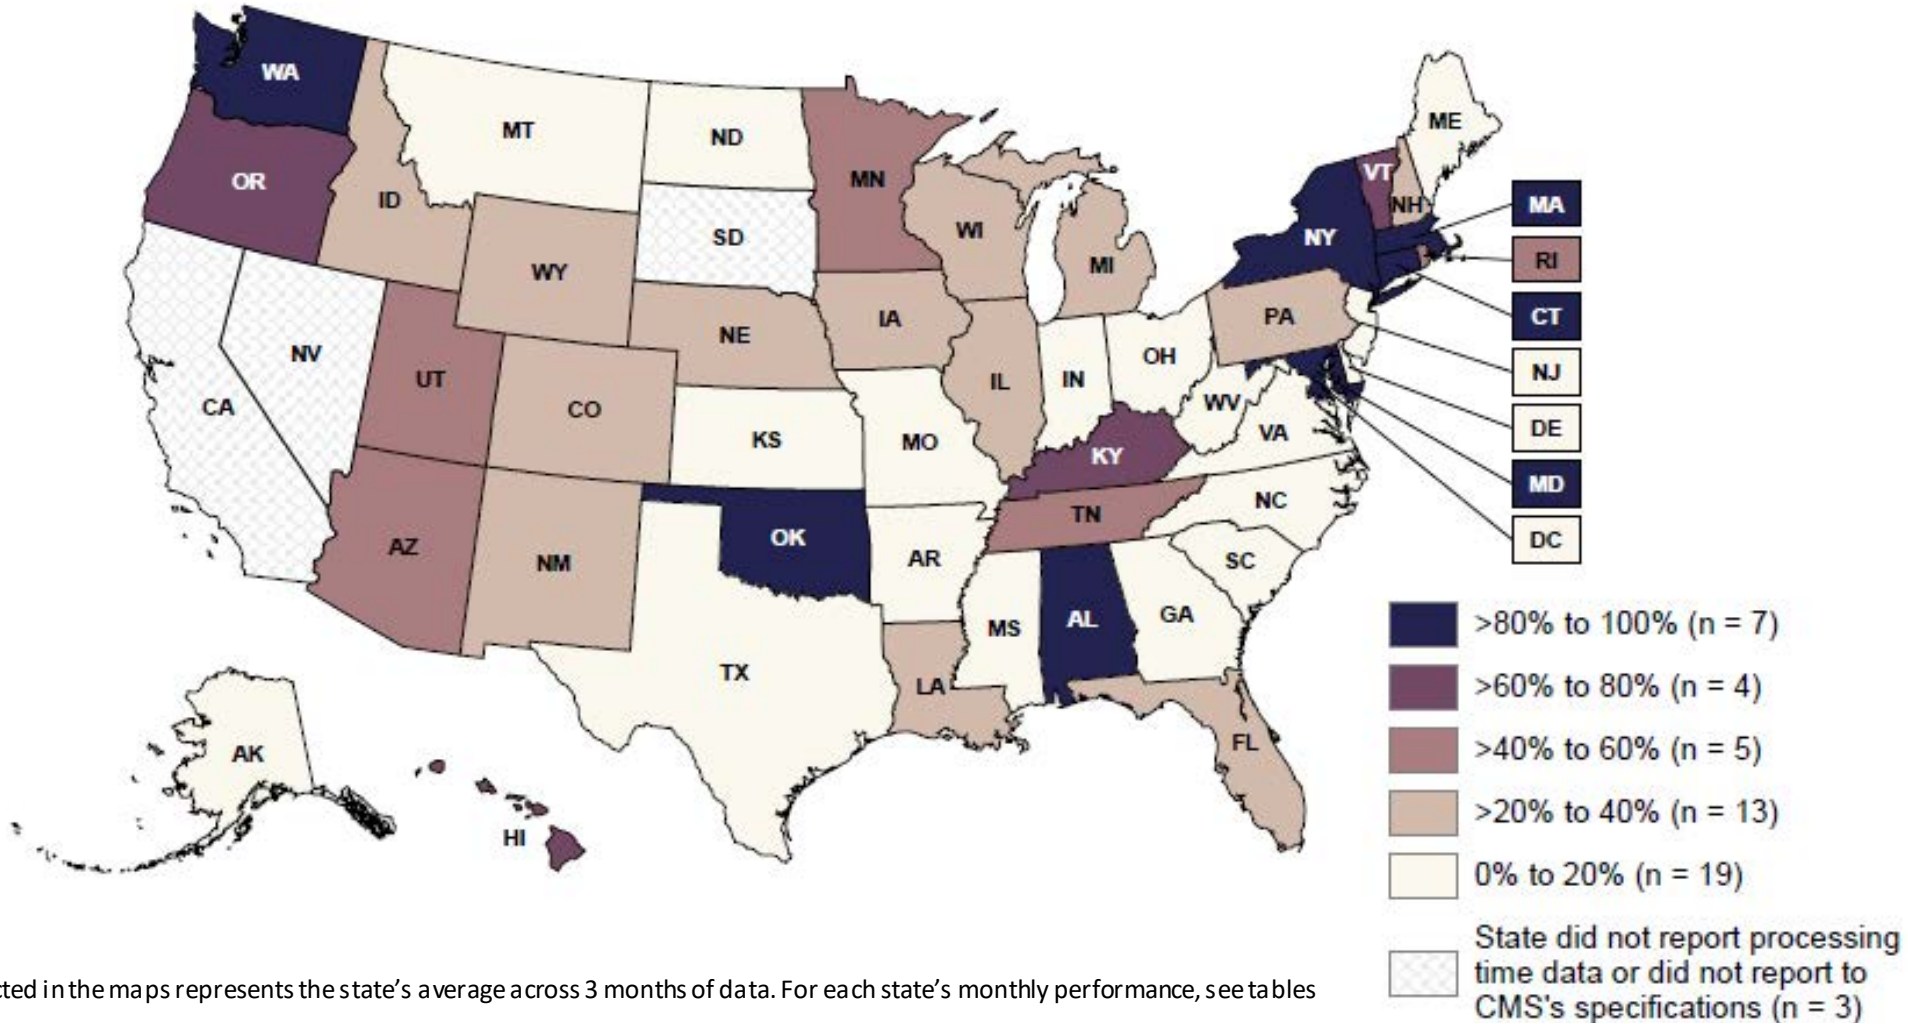

ii. States include AK, AZ, MA, MI, MO, MT, NH, OH, SC, TN, VA, VT, and WY.

iii. States include AR, CO, DC, DE, FL, GA, HI, ID, IL, IN, KS, KY, LA, ME, MS, NC, ND, NE, NJ, NM, OR, RI, TX, UT, WI, and WV.

iv. The national total for each month is a weighted average of the percentage of determinations conducted within each category across states, with each state's percentage weighted by the number of determinations the state conducted within the month. The April – June average is weighted by the number of determinations conducted nationally in each of the three months.

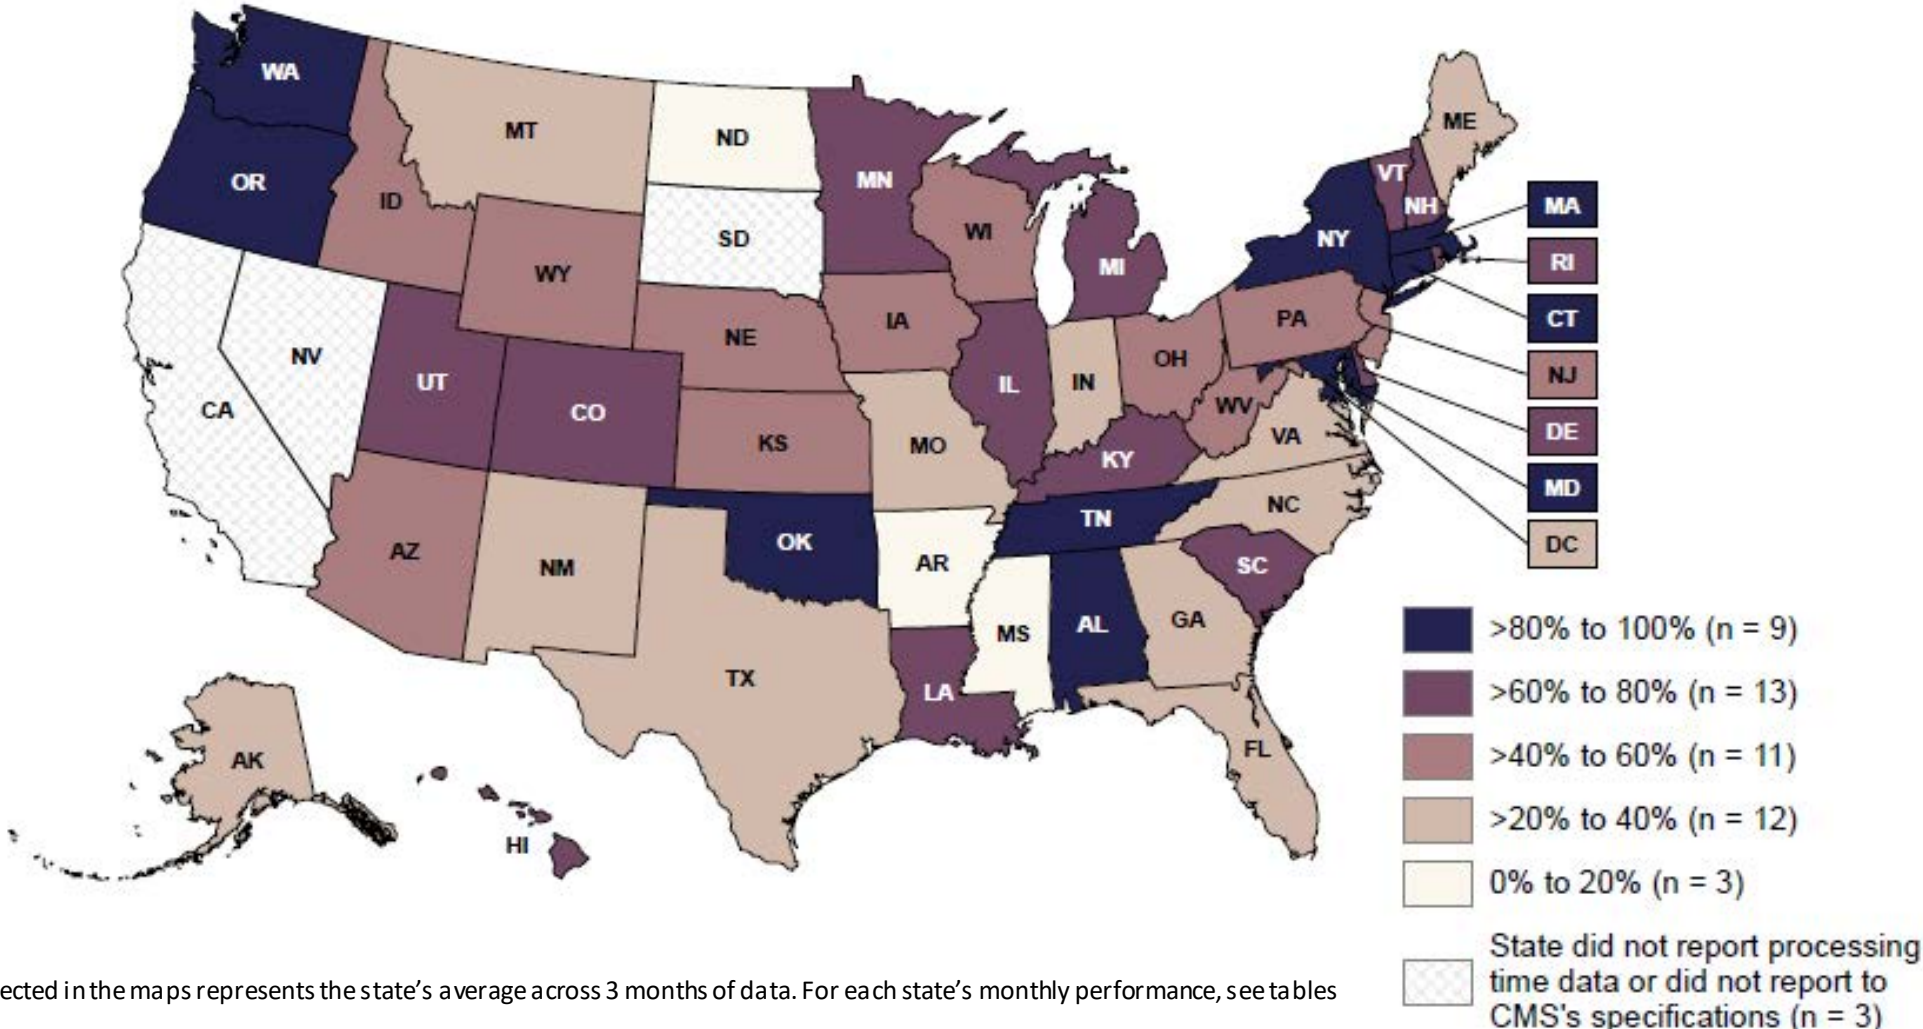

# Percentage of Medicaid MAGI and CHIP Determinations at Application Processed Within 24 Hours, April 2023 – June 2023

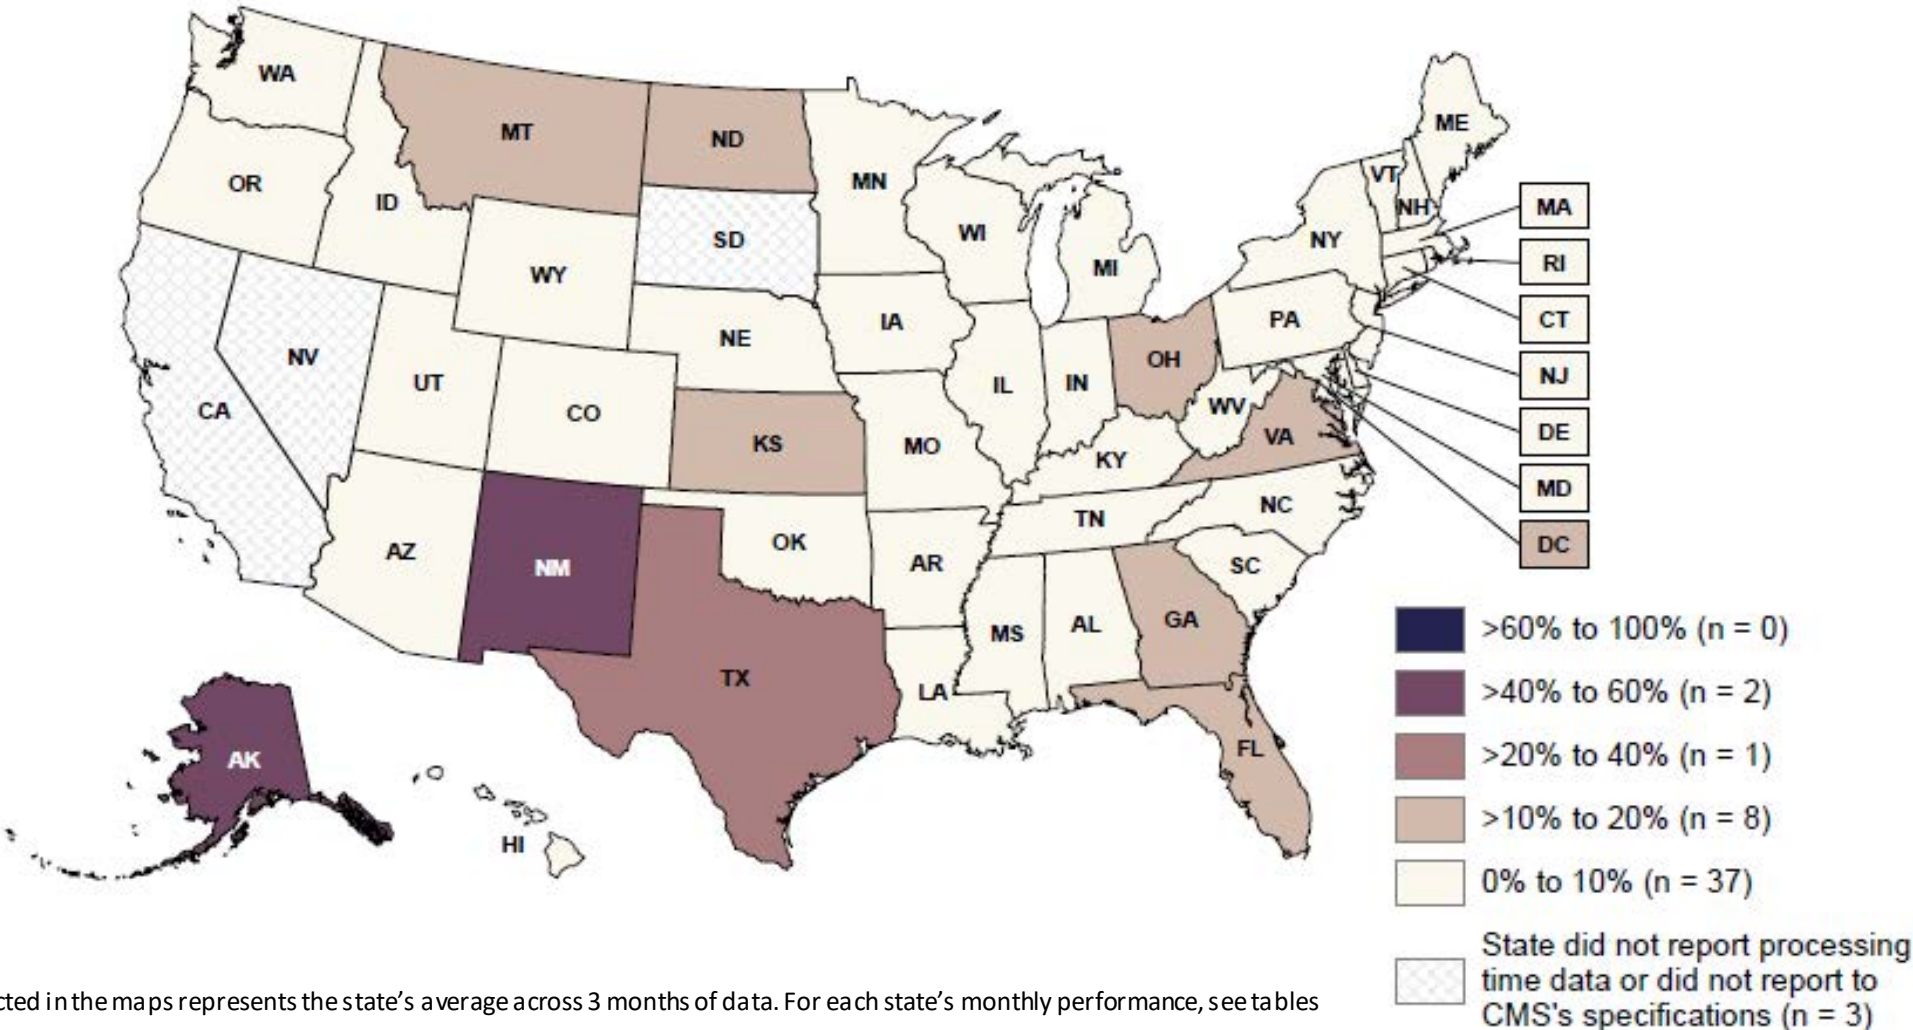

Note: The data reflected in the maps represents the state’s average across 3 months of data. For each state’s monthly performance, see tables below.

# Percentage of Medicaid MAGI and CHIP Determinations at Application Processed Within 7 Days, April 2023 – June 2023

Note: The data reflected in the maps represents the state’s average across 3 months of data. For each state’s monthly performance, see tables below.

# Percentage of Medicaid MAGI and CHIP Determinations at Application Processed in More Than 45 Days, April 2023 – June 2023

Note: The data reflected in the maps represents the state's average across 3 months of data. For each state's monthly performance, see tables below.

# MAGI Application Processing Time Report by State: Alabama, Alaska, Arizona, and Arkansas

State	Month	Percent of Determinations Processed < 24 Hours	Percent of Determinations Processed 1–7 Days	Percent of Determinations Processed 8–30 Days	Percent of Determinations Processed 31–45 Days	Percent of Determinations Processed > 45 Days
Alabama	April*	79%	10%	9%	2%	1%
	May*	81%	8%	9%	1%	1%
	June*	82%	7%	8%	2%	1%
Alaska	April <sup>(V)</sup> *	6%	31%	15%	3%	45%
	May <sup>(V)</sup> *	3%	32%	16%	9%	40%
	June <sup>(V)</sup> *	9%	23%	17%	7%	45%
Arizona	April <sup>(V)</sup> *	40%	16%	37%	4%	3%
	May <sup>(V)</sup> *	40%	17%	36%	4%	3%
	June <sup>(V)</sup> *	42%	18%	34%	5%	2%
Arkansas	April*	7%	16%	61%	11%	4%
	May*	8%	9%	65%	13%	5%
	June*	7%	8%	56%	21%	8%

Note: See slides 25 and 26 for data limitation categories and key. Percentages may not sum to 100 due to rounding.

# MAGI Application Processing Time Report by State: California, Colorado, Connecticut, and Delaware

State	Month	Percent of Determinations Processed < 24 Hours	Percent of Determinations Processed 1–7 Days	Percent of Determinations Processed 8–30 Days	Percent of Determinations Processed 31–45 Days	Percent of Determinations Processed > 45 Days
California	April <sup>(II), (V)</sup>	24%	16%	26%	15%	19%
	May <sup>(II), (V)</sup>	23%	17%	28%	14%	18%
	June <sup>(II), (V)</sup>	25%	15%	26%	15%	19%
Colorado	April*	32%	27%	26%	7%	7%
	May*	37%	34%	22%	5%	3%
	June*	40%	28%	24%	5%	2%

# MAGI Application Processing Time Report by State: West Virginia, Wisconsin, Wyoming, and National Totals

State	Month	Percent of Determinations Processed < 24 Hours	Percent of Determinations Processed 1–7 Days	Percent of Determinations Processed 8–30 Days	Percent of Determinations Processed 31–45 Days	Percent of Determinations Processed > 45 Days
West Virginia	April*	21%	29%	38%	8%	3%
	May*	19%	29%	40%	9%	4%
	June*	19%	27%	39%	11%	4%
Wisconsin	April <sup>(III)</sup> *	39%	19%	31%	10%	1%
	May <sup>(III)</sup> *	39%	19%	30%	10%	1%
	June <sup>(III)</sup> *	34%	22%	33%	11%	1%
Wyoming	April*	21%	42%	34%	0%	3%
	May*	16%	42%	38%	2%	3%
	June*	25%	24%	45%	2%	3%
National Totals <sup>1</sup>	April	54%	14%	18%	7%	7%
	May	57%	13%	19%	6%	4%
	June	59%	13%	18%	6%	4%

1. The national total for each month is a weighted average of the percentage of determinations conducted within each category across states; each state's percentage is weighted by the number of determinations the state conducted within the month.

Note: See slides 25 and 26 for data limitation categories and key. Percentages may not sum to 100 due to rounding.

# Data Limitation Categories

- (I) Determinations conducted in less than 24 hours are reported under the 1-7 days category.
- (II) Includes some non-MAGI determinations on applications.
- (III) Incorrectly reporting processing time at application level, as opposed to the individual level.
- (IV) MAGI determinations conducted in 6-7 days are reported under the 8-30 days category.
- (V) Incorrectly includes redeterminations.

# Key

- Due to system limitations, state did not report data for the processing time category.
- \* State's monthly application processing time data is included in the national total.

*National totals are calculated for only states reporting complete data that comports with CMS's reporting specifications.*

*April, May, and June 2023 national totals include 48 states (California, Nevada, and South Dakota are excluded in all months).*
